

Ben Rhyder

Design Folio

Solar Lily

Final Year Project

Floating solar array with 2 axis sun tracking, Solar Lily uses minimal mechanical components and takes advantage of open bodies of water, increasing power generation by up to 30% when compared to a ground based system.

Metria

Mixer tap

Mixer tap with matched faucet, die cast brass with
satin chrome finish.

Photography

An interest in wedding photography is driven by attention to detail and creativity

Eclipse

Sofa support rail

An alternative to clinically styled grab rails, Eclipse offers more stylish assistance that blends in with home décor

Greenblock

Mailbox

Mailbox solution doubling as a low front wall, can easily accept most off-the-shelf mailbox inserts. The frosted glass house number can be customised by the client to add a personal touch.

Prototyping

Experience with microprocessors and other electronics, creating functional models, rapid prototyping techniques and operating workshop equipment such as a lathes, mills, drill presses.

Milkshake topping

3L PET bottle

Blow moulded PET joining to a pre-moulded ABS handle, this new bottle maintains a unique but recognisable aesthetic for Edlyn's milkshake toppings and cordials.

Mechanics

A hobby of automotive mechanics and fabrication develops and encourages my engineering mindset. It's given me a wide range of experience from general maintenance through to engine reconditioning and performance modifications.

NoGlo

Safe indoor heating

NoGlo is an indoor heater designed primarily for camper vans. Heated liquid is pumped through the fins to heat the space without any glowing elements.

.dock

Phone dock

.dock makes use of a standard lightning cable to form a low cost, simple to manufacture phone dock. Components are assembled by the end user around a cable they already own.

Work Experience

See resume for more details

JARDAN

- CAD Models and drawings for manufacturing
- Commissioning factory equipment
- Operating prototyping equipment
- Data management

eSHEPHERD
AGERSSENS

- Hardware design and modification
- Lead mobile app developer
- Various IoT platforms
- Systems engineering

Familiarity with a wide variety of software and hardware platforms
